

TTM Global PCB Environmental Data  
for CY 2014

NOTE: TTM expanded greatly by acquiring the former Meadville Holdings PCB plants in China. However, no historical data from these plants is available prior to 2013. Further, the data below does not contain any Viasystems data (acquired June 2015).

Parameter	<b>2013</b>	<b>2,014</b>		Change %	<b>2,014</b> % of Total
<b>GHG Emissions</b>					
On-site fuel combustion	15,244	18,296	mtons	20.0%	4.24%
Purchased electricity	404,866	413,019	mtons	2.0%	95.76%
<b>Total</b>	<b>420,110</b>	<b>431,315</b>	<b>mtons</b>	2.7%	
<b>Water Use</b>					
Purchased water	8,703,490	8,245,555	m3	-5.3%	79.92%
Recycled water	904,049	2,071,800	m3	129.2%	20.08%
<b>Total</b>	<b>9,607,539</b>	<b>10,317,355</b>	<b>m3</b>	7.4%	
<b>Waste Generation</b>					
Hazardous waste	49,029	56,283	mtons	14.8%	
Hazardous waste recycled	48,033	52,126	mtons	8.5%	92.62%
Non-hazardous solid waste	10,465	10,509	mtons	0.4%	
Non-haz solid waste recycled	8,726	9,016	mtons	3.3%	85.79%

TTM's goal is to reduce the above three parameters using 2013 data as the base year.
